

# IMMERSIVE STEM SOLUTIONS

Imagine dissecting a frog without getting messy or building a robot without worrying about limited supplies or student safety. Then imagine doing this during your 45 minute science class - **zSpace makes it possible.**

An exclusive program for K-12 schools who want to revolutionize the way students learn.

**zSpace**<sup>®</sup>

## The zSpace STEM Package:

- Inspires student understanding
- Empowers, mastery-based learning
- Accelerates understanding of complex concepts
- Creates unique collaboration opportunities

## The zSpace STEM Lab Includes:

- Student STEM Stations
- Teacher STEM Stations with zView presentation capability
- 6 months of Teacher Startup Services and one day of on-site training

## The zSpace Learning Applications:

- Project-based learning: Study electricity and magnetism from basic charges to motor mechanics by building a robot
- Experimentation: Answer questions about Newton's Laws through user-created experiments
- Exploration: Compare, contrast, and relate structure to function in thousands of models using interactive discovery tools
