

# Girls Maker Lab Project

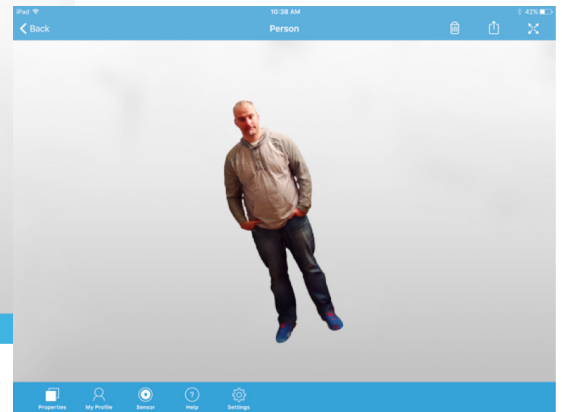

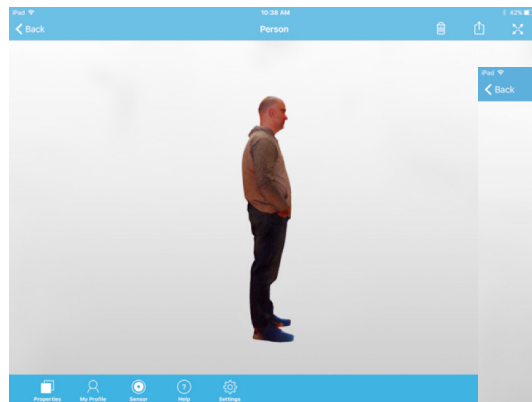

## Elizabeth Forward High School's FABLab

*Shared by Dr. Todd Keruskin, Assistant Superintendent of Schools*

A GREAT Story from EF's FABLab. Mrs. Smith, an awesome HS FABLab teacher, gave her ALL girls maker class a design project with a 3D scanner and a 3D printer.

*Abby, an awesome student, took the 3D scanner home and created a 3D model of her dad.*

*Abby 3D printed her dad and created a mold from the 3D print. Once she had the mold, she used it to create an ice sculpture of her dad. She also made a white chocolate mold of him! Happy Valentine's Day!*

**A GREAT teacher + a creative student + a FABLab = Innovation!**
