MINDS-i STEM INTEGRATED ROBOTICS: UAV XL + UGV DRONES LAB

The MINDS-i Drones Lab and Curriculum is an introduction into the world of Drones and Robotics. It is designed as an interactive approach to applied science, technology, engineering and math. In this course students will become familiar with the basics of Drone robotics and programming in a team based environment.

STEM as a System

MINDS-i is rocking the Robotics Education world with a high-technology platform that is simple to use, extraordinarily durable, infinitely modifiable, and will prepare students with the skills they need to excel in the 21st century.

Continuous Learning and Improvement

We inspire a rigorous college and career relevant experience through STEM Robotics in the everyday classroom in a format that can impact each and every student.

Course Design

Each lab is one semester (90 Hours), designed for three to five students. Foundations is the recommended prerequisite to the Drones Lab + Curriculum.
