Get Your **FREE** Firmware Upgrade and Switch to TR2 Inks for Improved Efficiency, Color and Performance

Start your upgrade today.
Availability of first generation TR Ink will end soon.

First generation TrueVIS owners:

Please be aware, Roland DG is discontinuing TR INK by February 1, 2021.* But don't wait. Make your switch today to take advantage of improved running cost and performance.

TR2 ink and firmware updates offer many improvements over the first the generation TrueVIS and TR ink, including:

- Lower running cost due to optimized cleaning cycles
- 3M™ MCS™ Warranty and Avery Dennison™ ICS™ Performance Guarantee
- Wider color gamut and True Rich Color
- Cutting improvements with a Multi-Crop function
- More efficient cleaning features
- Nozzle mask function
- Quicker print/cut test pattern process
- Left and right-side alignment for cut calibration
- Overcut function for sharp, clean-cut edges with easy-to-weed corners
- Scale feature added to print/cut adjustment
- More efficient menu navigation
